The Rules

- Each player draws 2³ red cards. The player with the most recent security incident begins as the blue team, turns over and reads aloud a blue card. Everyone else (the red team) plays one or more red cards face down to fill in the blank(s).
- The blue team shuffles and reads aloud each combo, picking the winning red card. Whoever played the answer keeps the blue card for scoring.
- The blue team role shifts to the left for the next round, and everyone draws back up to 10 red cards.
- *Hack the rules to your liking, push to prod!*

The Creds

This work is licensed by Jon Camfield under a Creative Commons Attribution-NonCommercial-ShareAlike 4.0 International License. Thanks to everyone who's shared card ideas or whiskeys along the way.

Lock icon by Font Awesome. There's probably some jquery in here too.
